About the job

Lead Software Engineer - Python🚀
Salary - £90,000 - £110,000
Health-Tech Startup🙌
London, London - Hybrid (1 day Kings Cross)👌
Founded - 2022 😎
£3million Seed Funding 💰

I am partnered with a Health-Tech Startup revolutionising healthcare by tackling one of the NHS's biggest challenges — Missed appointments and the growing waitlist, through the power of AI & ML.

Founded in 2022, the company is on the verge of raising £3 million in Seed funding, setting the stage for significant growth. 🚀

The Role - Lead Backend Engineer

They are now looking for a highly skilled Lead Backend Engineer to join their growing team. This is a crucial role as they embark on their next phase of expansion. You'll be 100% hands-on, with the opportunity to step into a leadership role as the team scales.

Tech Stack - Python, FastAPI, AWS, Typescript, PostgreSQL, NumPy, Pandas

What You'll Be Doing -

- Designing, building, and maintaining scalable backend systems for AI-driven healthcare solutions.
- Working closely with the ML engineers to integrate AI/ML models into production.
- Ensuring system reliability, security, and performance.

- Driving best practices in backend engineering and mentoring junior developers as the team grows.
- Collaborating with stakeholders to define technical roadmaps and architecture decisions.

What's in it for You?

- 💰 Salary: £90,000 - £110,000 + Equity
- 📍 Hybrid work setup—London office (King's Cross) 1 day a week
- 🚀 The chance to be part of a fast-growing startup making a real impact in healthcare
- 📈 Career growth with the opportunity to transition into a leadership role
